

ESG PERFORMANCE SNAPSHOT

Apache considers how its operations affect the planet and seeks to reduce impacts at every stage of our business.

METHANE EMISSIONS

- ▶ By 2025, Apache is committed to reducing its methane emissions to 0.36 percent or less of total methane production.

Methane Emissions Intensity¹

¹ tCO₂e/Mboe = metric tons of carbon dioxide equivalent per thousands of barrels of oil equivalent

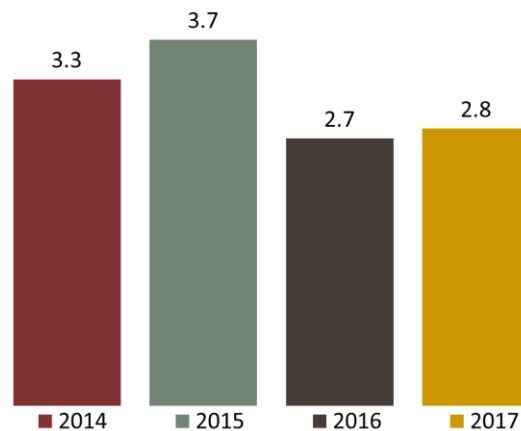

² The 2016 value was revised based on updated data

³ Bbls/Boe = barrels of water withdrawn per barrel of oil equivalent produced

WATER WITHDRAWALS

- ▶ In 2017, 98 percent of water withdrawals were nonpotable.

Water Usage Intensity³

⁴ Workforce TRIR includes Apache employees at all levels and contractors

⁵ Total Recordable Incident Rate is calculated by multiplying total number of recordable injuries by 200,000 hours and then dividing by total person-hours worked

WORKFORCE SAFETY

- ▶ Compensation for Apache employees at every level is tied to key employee safety metrics.

Workforce⁴ Total Recordable Incident Rate⁵
